Telephone On-Hold Marketing System

www.info-chip.com

Because Your Callers Are Your Business!

They're calling your company or organization to get information they need about the products and services you offer. Then, because you're busy, they get placed on hold.

Now What?

No worries! Your company uses the 100% digital DPU3K System for telephone on-hold marketing from Info-Chip Communications Ltd.

The DPU3K System offers the flexibility to include a variety of Info-Chip created productions...from generic to fully customized. Custom productions deliver the information you want your callers to hear while they're waiting to speak with you!

Information such as:

- new products and services
- locations, directions, and hours
- helpful suggestions
- new website information
- plus much, much more (it's like your very own personal radio station where you control the programming!)

Key Features:

- Internet-based delivery of productions automatically to the unit
- Easy to install...just plug in and play!
- 100% maintenance-free...no moving parts!
- SD card functionality allows for use in non-network environments
- 30 second user-recordable message option
- Browser-based control for easy administration
- Productions and all unit settings are non-volatile...no reloading or reprogramming if power goes out
- Music licensing covered through Info-Chip Communications Ltd.
- Complete with AC adapter and audio cable included
- Seven-year manufacturer's warranty...the best in the business!

Simply contact the Info-Chip Dealer below and get started right away with the 100% digital DPU3K System for telephone on-hold marketing from Info-Chip Communications Ltd.

Best of all, the DPU3K System makes your company's bottom line look even better. On-hold marketing from Info-Chip Communications is *proven* to increase business!
